## **PCSC Expands Its Fully Browser-enabled Access Control Security Systems Portfolio by Integrating Best-in-Class Visitor Management**

*HID Global Partners with PCSC in Reseller Agreement for EasyLobby Secure Visitor Management Software*

TORRANCE, Calif., January 9, 2013 – PCSC, a designer and manufacturer of quality access control solutions confirms that it has entered into a reseller agreement with [HID Global](#)<sup>®</sup>, a worldwide leader in secure identity solutions. The agreement will enable PCSC to resell HID Global's [EasyLobby<sup>®</sup> Secure Visitor Management \(SVM<sup>™</sup>\) software](#) as part of PCSC's LiNC-NXG<sup>™</sup> software, a fully browser-enabled access control system.

“Our partnership with HID Global allows PCSC to offer our customers a single, comprehensive and integrated security solution that includes many feature-rich applications such as access control, alarm monitoring and processing, and video badging now combined with visitor management,” said Al Portal, Director of Sales, Americas with PCSC. “The seamless integration of the enterprise-class EasyLobby SVM<sup>™</sup> software with our [LiNC-NXG system](#) allows us to provide important new visitor management capabilities that PCSC customers can utilize across corporations, government agencies, educational institutions, healthcare and property management markets.”

HID Global's [EasyLobby SVM solution](#) provides a more streamlined approach to managing the visitor registration process. When a visitor or contractor is badged using the SVM software, the information is automatically passed from the SVM database to LiNC-NXG and the visitor badge is activated in real-time, enabling lobby attendants to accurately and quickly record visitor information. This provides improved security within the facility and eliminates the need for a visitor paper log, which is often inaccurate and unsecure.
