Vigatron and PCSC Form a Worldwide Access Control Partnership

Torrance, CA; San Diego, CA October, 2015 – PCSC, a provider of state of the art access control systems, and Vigatron, Inc., a global leader in analog and IP infrastructure transmission solutions, have announced the expansion of their relationship to form a world-wide partnership. Under this agreement, Vigatron will provide infrastructure equipment for PCSC’s growing line of IP/PoE based Access Control products, as well as, service, training, and technology sharing.

“Our mutual partnership is a clear indication of the rapid expansion of access control systems using IP and PoE,” stated Neil Heller, Vigatron’s Vice President of Business Development. “This agreement will assure PCSC customers have reliable and cost effective infrastructures designed specifically for their applications and backed by the industry’s longest warranty. In return, PCSC’s long standing and deep knowledge of the access control market and technology is providing Vigatron the ability to expand its product lines and knowledge base. This partnership mutually benefits both companies and our customers.”

“We’re excited to further strengthen our business relationship. The continued convergence of the IP/IT world with physical security demands integrated solutions. We recognize this need, and have been at the forefront of offering IP based security products to those professionals,” said Mas Kosaka, President and CEO of PCSC. “We have found Vigatron’s PoE devices complement our IP based access control solutions, strengthening our Fault Tolerant architecture offering. Enabling power and communication to all LAN devices, whether it is video or entry point hardware is advantageous. Leveraging IP/IT infrastructure means eliminating the need for local power, this consolidates and saves labor costs and reduces install time, all while being more scalable.”

About PCSC Security- Headquartered in Torrance, California, PCSC is a designer and manufacturer of quality access control solutions. From integrated hardware to sophisticated access control management software, including: door entry access, video badging, CCTV control, elevator control, alarm graphics, perimeter, pipeline and underwater detection systems, and video event recording. With a full-line of wired and wireless intelligent controllers, Fault Tolerant systems and multiple card reader technologies to choose from.
