LiNC-Ez™

Building Management Made Easy

▶ The LiNC-Ez NRX Kit, a professsional, yet low cost access solution. A complete two-door package that allows up to 12,000 cardholders and up to 64 doors. The kit includes: LiNC-Ez Software, 2 Door Controller with Enclosure & Power Supply, RS 485 Communications Converter, 2 Proximity Readers and 50 Proximity Cards.

Are you looking for an easy security solution?

LiNC-Ez provides everything you need to manage your access control, alarm monitoring and building needs. The ease begins right at installation with a self guided wizard to help load and configure your system. With its enhanced preprogrammed access parameters and schedules, LiNC-Ez is ready to use immediately after installation.

With LiNC-Ez's feature rich applications found normally in more expensive systems, it's easy to see why more people are choosing it as their building management solution.

Easy to Install

Simply insert the LiNC-Ez CD software and it practically installs itself. The Windows® based installation program will guide you step-by-step through the entire process. Once installed, LiNC-Ez will automatically communicate with the intelligent controllers and download the necessary parameters without operator intervention.
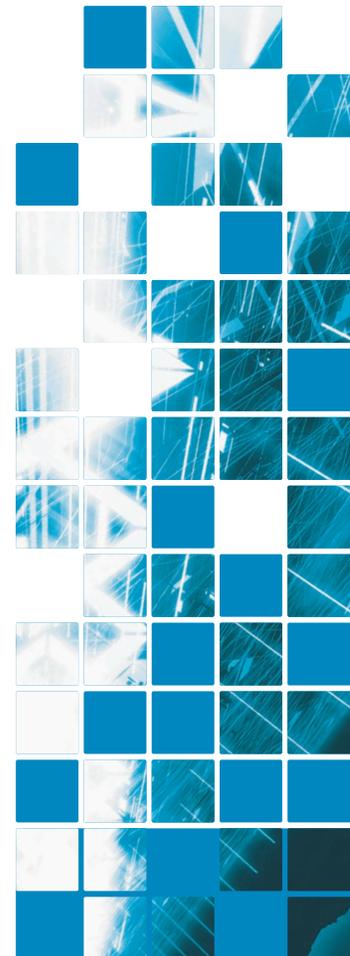

Easy to Program

LiNC-Ez was developed using Windows® conventions, making using the software easier. The software comes preprogrammed with user data to help speed your system administration, such as standard Card Information, Time Schedules and Authorization Levels. It is even pre-programmed with a complete Holiday schedule. All you have to do is hand out the proximity cards to the users.

Ez to Expand

LiNC-Ez is already full featured, it is designed to control up to 32 intelligent controllers or 64 doors. No need to purchase upgrades because none are needed. Just connect the new controllers with a twisted pair wire to add more capabilities.

Intelligent Controllers

The LiNC-Ez family of products consists of 100% distributed intelligent controllers, specifically designed to meet your needs. The sophistication and the security provided by the 5 state alarm monitoring feature have been recognized by government agencies around the world.

LiNC-Ez™

Building Management Made Easy

Security Software

Simplify your life with LiNC-Ez security software to manage your access control, alarm monitoring or building controls. The LiNC-Ez software guides you in programming the intelligent controllers that provide your security, monitors building controls and security devices. The software collects the logs of all activity, which can be monitored in real-time or use the events to create reports about what is happening in your building.

PCSC's Windows® based software provides a startup wizard and pre-programmed default information to help get your security system up and operating quickly. The screen interface provides a left side bar which groups the windows by what you want to accomplish, such as Host, Panel, Database and View. Add the online manual for quick reference and you have a software package designed to make your security system easy to program, manage and control.

Minimum System Requirements: Pentium III, 750 MHz CPU, 256 MB RAM, 100 MB free disk space, CD-ROM, Windows® 2000, XP or Vista.

- Automatic Program Installation and Setup
- 12,000 Cardholders
- 5,000 History Transactions Standalone, 50,000 on System
- Up to 64 Readers
- Handicapped Access Entry
- Automatic Card Activation and Deactivation
- Auto Holiday, Leap Year & Daylight Savings Control
- User-friendly Reports
- Electronic Update of Firmware
- Communicates via RS-485, Dialup Modems, Ethernet LAN* or ZigBee™ Pro Wireless
- Easy Device Installation
- Photo Image Importing
- Timed Anti-passback

Supported Hardware

PCSC builds state-of-the-art, yet easily supported intelligent controllers at low prices for the security industry. Each PCSC controller is manufactured with surface mount technology, utilizes flash memory to allow easy upgrading of software and features on the controller, onboard power management to keep the controller operating while at the same time protecting it, transient protection on all inputs, socketed relays for all outputs and snap on/off connectors—all these features make our electronic hardware just keep on working, yet still flexible to support your future needs. The **NRX** is a complete two door access control panel with additional inputs and outputs for managing additional security devices. A solid platform to start your access control and is part of the Building Management security solution provided by the LiNC-Ez family.

Integrated Solutions

Technology continues to change and your building management / security system has to be able to adapt to support those changes. The LiNC-Ez suite of products provides that flexibility and thus insures a long-lasting solution for you. LiNC-Ez provides the interface to new access control technologies, whether new type of cards/readers or biometric solutions, such as smart cards, fingerprint readers, facial recognition, safe iris scan or other identification technologies. LiNC-Ez's support of digital and analog monitoring devices, continues to expand your ability to manage both security and building functions with one easy solution.
