Vigitron and PCSC Announces Partnership on Access Control Projects

Torrance, CA; San Diego, CA April 1, 2015 - PCSC, a state-of-the-art designer and manufacturer of access control systems and Vigitron, Inc., a global leader in analog and IP infrastructure transmission solutions, have announced a working partnership for Vigitron to provide reliable network switching and PoE products as part of PCSC's IP access control solutions.

"We have found Vigitron's PoE devices complement our IP based access control solutions, strengthening our Fault Tolerant architecture offering," said Mas Kosaka, President and CEO of PCSC. "Enabling power and communication to all LAN devices, whether it is video or entry point hardware is advantageous. Leveraging IP/IT infrastructure means eliminating the need for local power, this consolidates and saves labor costs and reduces install time, all while being more scalable."

"We're excited over the synergy that stems from this partnership," said Al Portal, PCSC's Director of Sales, Americas. "Quality meets affordability with Vigitron products. Anytime we can offer our business partners additional product IP solutions that meet our vision of tomorrow's access control standards, it is a win-win for all."

"We are pleased to have been selected by PCSC," stated Neil Heller, Vigitron's Vice President of Business Development, "The partnership is based on Vigitron's unique product features which offer stable and reliable PoE power with the ability to respond to the high surge requirements of door strike and mag locks. PCSC products, such as their IP/PoE patented 'Fault Tolerant' system, will be integrated into Vigitron's Design Center service to provide expanded coverage for PCSC's sales channel and to assist with the design of their IP-based infrastructure requirements."

About PCSC Security- Headquartered in Torrance, California, PCSC is a designer and manufacturer of quality access control solutions. From integrated hardware to sophisticated access control management software, including: door entry access, video badging, CCTV control, elevator control, alarm graphics, perimeter, pipeline and underwater detection systems, and video event recording. With a full-line of wired and wireless intelligent controllers, Fault Tolerant systems and multiple card reader technologies to choose from. For more information, please visit PCSC website at www.pcscsecurity.com.

About Vigitron, Inc. - Vigitron is a global leading manufacturer of analog and IP transmission solutions based in the USA with over 20 years of experience. Vigitron products are used in the most demanding security applications world-wide and are supported by certification testing, IP camera manufacturer compatibility testing, and the industry's longest warranty. Vigitron offers free and complete infrastructure design services, as well as, technical trainings. For more information, please visit Vigitron website at www.vigitron.com.
