LiNC-NXG Client Cloud (NXG CC)

NXG CC is a proven leading access control system made available to you through "Cloud" technology. It's a complete high security access and burglar system without the need for complex system training. A simple to use Web browser enables administration of your employees access privileges via an assigned ID. If you decide to have the system managed by PCSC, all you need to do is send us your Change Request via an authorized email administer to activate or delete an ID. We can even provide weekly or monthly reports. The system allows you to determine when employees have access permission by reader, by time of day, day of week and even by holidays. You decide who goes where and when. To use the system, simply present your access ID or mobile phone to the security reader. If an ID key is lost or stolen, simply inactivate the ID, there is no need to call a locksmith to rekey your mechanical lock and reissue new keys.

Features & Benefits of NXG CC

- Manage access into your facility by time, door, day of week, and holiday
- Delete lost or stolen cards immediately
- Automatically disarm or arm your burglar system with valid access, no need to give out PINs
- Automatic door opening by time of day after a valid access
- Know if a door has been left open
- Automatic Daylight Saving Time setup and control
- Have the system managed by PCSC by an authorized email administrator
- High Security Dual Authentication, ID and PIN Code (available with Reader Keypad combination unit)

Who's in your office?
Who's not?

Easily configure and manage access to your facility.

Typical Situations
Effective Solutions

What if an employee gets to the office and realizes they forgot to bring their access card?
The door can be remotely unlocked by the administrator using the NXG CC Web portal.

Can I organize access privilege by time?
Access permissions are granted by Door, Time of Day, Day of Week and by Holiday.

What if someone looses their ID card or mobile application?
Simply inactiveate the ID number or call us, we'll be happy to inactive it.

Can I get a report to see who was given acess during the weekend?
Reports of access granted by a date range can be generated and sent to you by email.

Do you have a lease program?
Yes, we provide a lease program
