

# LiNC-PLUS 4.0 Access Control Software

PCSC is the industry leader in providing intuitive, user friendly, Access Control Solutions. Our LiNC-PLUS 4.0 software offers multiple views to monitor status, health and wellness of your access control system. Pop-up screens for each panel allow the operator to enable, disable, and activate any point in the system. Legends on each hardware control screen provide the operator easy reference explaining device statuses. The system is modular in design to minimize cost while not limiting scalability.

## Key Features

- Hardware Management View is a graphical representation of system health and configuration notifications.
- Access Management View makes it easy to configure holidays, time zones, Access Assignments and User Information.
- Activity View gives the user multiple real-time activity logs that can be filter transactions down as granular as an individual access control panel.
- Scheduled Events View provides easy administration of special access control activities.
- Reports View provides quick reference to card records, department, cardholder activity, card changes, and system information.
- Easy to configure elevator control.
- LiNC-PLUS 4.0 has Safeguards in place to reduce administrative errors.
- Scalable to unlimited reader.

## System Requirements

Operating System: Windows 10, Windows 7 (Professional or Ultimate), Windows Server 2008 R2 (SP1), Windows Server 2012, Windows Server 2012 R2

Minimum: CPU (Processor): Intel CORE2 Duo 2.0GHz

RAM (Memory): 4GB DDR2 800 MHz

HDD (Disk Space): 200GB 7200RPM SATA-II 300

VGA (Video): 512MB VRAM @ 1280 x 1024, (32 bit color)

Required with Video Integration:

CPU (Processor): Intel I7 Quad Core or Higher. 433MHZ

RAM (Memory): Minimum 16GB DDR4 SDRAM, Recommended 32GB DDR4 SDRAM

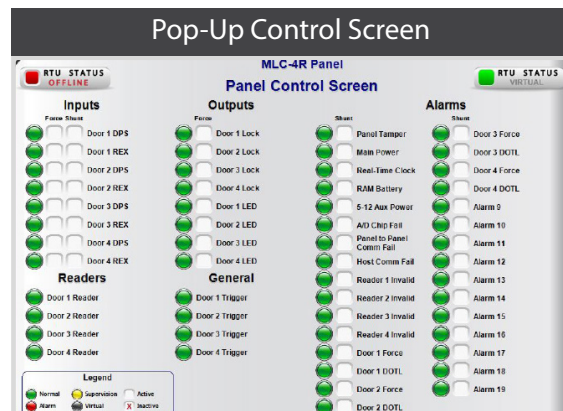

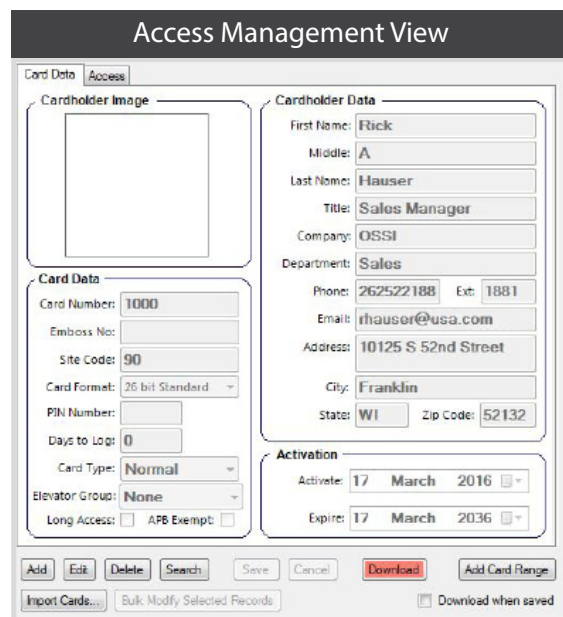

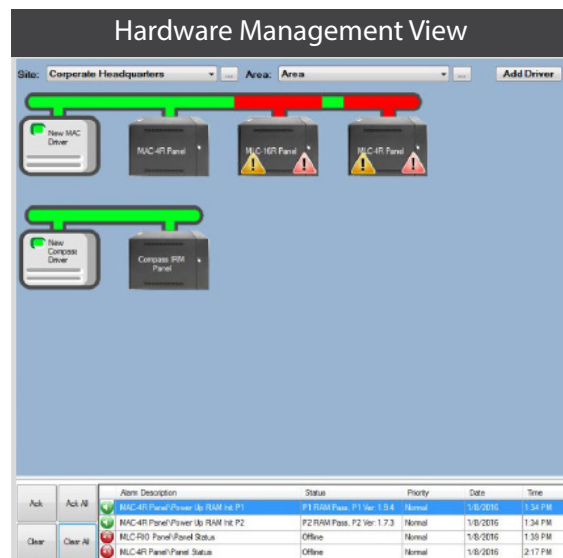

HDD (Disk Space): Primary 250GB SSD, Secondary 1TB 7200 RPM SATA

VGA (Video): Minimum: 1GB VRAM DDR3 @ 700MHZ Recommended: 4GB VRAM DDR3 @ 700MHZ

Network & Protocols: 100/1000 network adapter with Windows TCP/IP

A Windows compatible sound device or card is recommended on the Client systems so that alerts and other sounds may be heard.

\*\*\* The software can be upgraded to a fully integrated Situational Awareness application incorporating Video, Intrusion, Intercom, Fire, and Building Management. Ask for details.
