PCSC and Coolfire Solutions Announce Integration Efforts to Provide Security Industry Solutions Like No Other

Transforming physical security related data into actionable intelligence for real-world, real-time situational events

TORRANCE, CA – (April 3, 2019) PCSC, a designer and manufacturer of access control solutions and Coolfire Solutions, a St. Louis based software company known for creating Military-Grade situational awareness platforms collaborate to deliver top-level capabilities for access and security.

Coolfire Solutions created its innovative Ronin Platform to deliver software that sits on top of existing systems and infrastructure to transform data into actionable intelligence. Originally developed for the U.S. military, the Ronin Platform is being widely adopted by industry leaders and organizations who recognize the importance of placing the right data, in the right hands, in real-time, so that intelligent decisions can be made.

Stacking the Ronin Platform on top of the data provided by PCSC's LiNC-NXG physical security information management system provides a robust, real-time common operational picture, visually representing physical security events, and enabling a coordinated security response. For instance, urgent security related event details are pushed to mobile devices of nearby security officials for immediate action. An additional benefit, in the case of an on-premises environment, the underlying access management system is not exposed, only the top-level data is managed.

"An extremely impressive GUI for our industry and an actionable set of features extend the capabilities of PCSC's access solutions for real-time response," said Mas Kosaka, President and CEO of PCSC. "The expansion possibilities are virtually limitless too. We're excited to debut the capabilities of Ronin to our Business Partners during the PCSC Symposium in conjunction with ISC West, the largest security industry trade show in the U.S."

continued...

"Coolfire Solutions and PCSC have the experience and capabilities to transform the way security professionals do their job every day. We can maximize the value of existing technology investments by combining data from any source and making it actionable," said Don Sharp, CEO at Coolfire Solutions. "Security professionals have an incredibly challenging job and it's only getting tougher. By bringing all of their critical data onto a single pane of glass we can increase the level of security while driving significant operational efficiencies."

About PCSC

PCSC is a leading supplier of products and services for electronic access control and facility management applications in domestic and international markets. PCSC also offers sophisticated access control management software, integrated video badging, CCTV control, alarm graphics, elevator control and video event recording. PCSC is a subsidiary of TTIK, Inc., and has been in business since 1983. PCSCsecurity.com

About Coolfire Solutions

Coolfire Solutions is the creator of the Ronin Platform, a real-time situational awareness delivery platform, built to integrate data from any source and transform it into actionable intelligence. Ronin was originally developed for the U.S. Military but is now being widely adopted by industry leaders such as Enterprise Rent-A-Car to minimize system gaps and improve operational efficiency.
