Dare to Measure Up?

The industry is ripe with access control and security solutions, the differences are advantageous.

See checklist on the next page...

Not all access controllers are created equal.

Our competitors controllers are not so fruitful. PCSC's Fault Tolerant Controller (FTC) is the most reliable controller on the market. We've compiled PCSC FTC features.

Dare to measure up the differences between Apples and Oranges.

Check List: PCSC Fault Tolerant Controller Series VS Leading Competitors Controller

PCSC FTC	Controller Features without Host Intervention	Competitor
✓	Up to 8 Automatic Fail Safe Redundancies	
✓	2 Alternate Communication Paths Per Controller	
✓	Altenate Wireless Mesh Communications	
✓	Automated Message Routing during Communication Failure	
✓	Virtual Point Architecture	
✓	99.9% Availability	
✓	Active Active Network Topology	
✓	Active Passive Network Topology	
✓	Peer to Peer Communication	
✓	Authentication Protocol	
✓	Automated Database Synchronization	
✓	100% System Availability During Firmware Updates	
✓	Vacuum Flourescent Network Activity and Status Display	
✓	Global Anti-Passback	
✓	Global Alarm Monitoring and Output Linking	
✓	24 digit Card Numbering	
✓	16 Authorization Per Cardholder	
✓	Card Activation By Date and Time (MM-DD-YY HH:MM:SS)	
✓	Card Deactivation By Date and Time (MM-DD-YY HH:MM:SS)	
✓	99 Affiliation Groups	
✓	Escort Required Card Entry	
✓	Supervisory Controlled Card Entry	
✓	Event Override Card Entry	
✓	Automatic Door Openings after First Valid Entry	
✓	Two Person Minimum Occupancy	
✓	365 Days of Holidays	
✓	2 Stage Local Door Alarm	
✓	Automated Motor Control Door Activation	
✓	Boolean Input-Output Logic	
✓	5 State Alarm Monitoring	
✓	Adaptive Cable Resistance Adjustment	
✓	Automatic Alarm Threshold Monitoring	
✓	Alarm Latching	
✓	Supervised Readers	
✓	UL Listed for Access Control and Alarm Monitoring
